Thermacell makes repellent products that protect people from mosquitoes.

Thermacell Mosquito Repellent mats contain allethrin. When heated by the butane cartridge, the allethrin is emitted into the surrounding area.

THERMACELL®

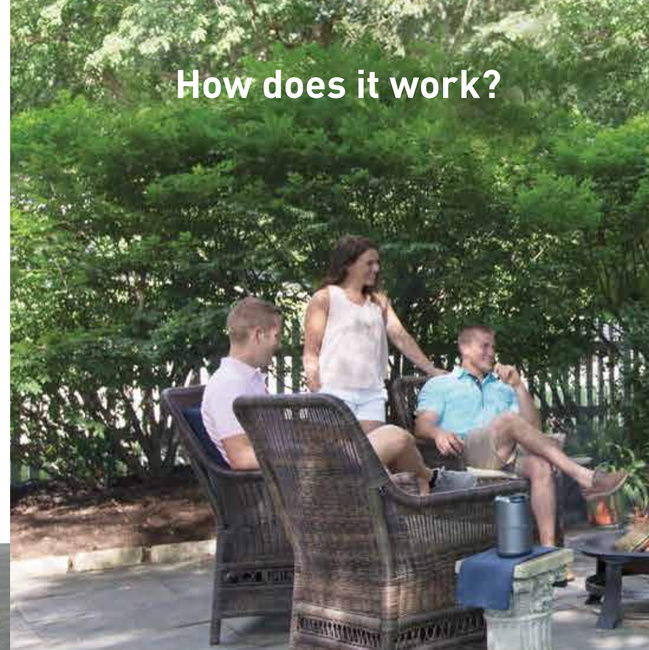
MOSQUITO REPELLENT

ACTIVE CONSTITUENT:
219.7g/kg ALLETHRIN 20:80

PROVIDES 21 m² ZONE OF PROTECTION

How does it work?



Getting Started:

1. Access the battery and fuel compartment by removing the bottom cover.

2. Pull battery pack out from the center to load betteries. Insert 4 AA batteries as indicated +/-. Return battery pack to unit, fitting contacts firmly into the socket.

3. Remove butane cartridge cap (if present) Screw 1-4 fuel cartridge(s) into ports in any order. DO NOT OVERTIGHTEN. Each cartridge runs for 12 hours, 4 cartridges will provide a total of 48 hours of run time.

4. Replace bottom cover.

Using the Halo:

1. Place the unit on a flat level surface. Remove protective cover.
2. Unwrap one Thermacell Mosquito Repellent mat. Slide mat under the grill.
3. To turn ON, locate the tab on the light ring. Slide the tab to the first position on the right. Wait 3 seconds and then push tab to second position, clicking to start.

   Confirm the unit is started by looking through the view window for a glow. If the glow is NOT visible, repeat #3.
4. To turn OFF, rotate the light ring tab to the left to the off position. Allow to cool. Return protective cover to top of unit when not in use.

ZoneCheck Monitor

Halo's ZoneCheck Monitor communicates the status of mosquito protection through the light ring.

Pulsing Light . . . . . Halo is warming up

Steady Light . . . . . Halo is at optimal temperature and creating a Zone of Protection against mosquitoes

Note: If the ZoneCheck monitor remains pulsing quickly for longer than 15 minutes, see Troubleshooting.

Useful Tips:

- Allow up to 15 minutes for product to take effect depending on size of area.
- Use one unit for an area up to 4.6m x 4.6m. Use additional units to cover a larger area.
- Place product upwind for maximum mosquito repellency. Windy conditions can reduce overall effectiveness.
- Some visible vapor will appear during use; this is normal.
- Mat turns from blue to white when it needs to be replaced.
- Altitudes above 2,100m may affect product performance.
- Cover must be off in order to use the mosquito repellent. When finished using mosquito repellent, replace cover to keep out water, dirt or other debris.
- Store in a clean, dry area when not in use to extend useful life.
- Mosquito repeller can be used without batteries for the ZoneCheck monitor if desired.

Troubleshooting

Pulsing light continues more than 15 minutes	• Check that at least 1 Thermacell fuel cartridge is inserted and has fuel; check view window for orange glow.
ZoneCheck Monitor not lighting up	• Check batteries. Do not mix different types or old/new batteries. • Confirm batteries are in correct +/- orientation in battery pack. • Confirm all contacts are clean and free of debris. • Ensure battery holder is fully seated into the bottom of the unit.
Unsure unit is working	• Make sure unit is on and running for at least 15 minutes • ensure cover is off and mat is installed correctly under grill • replace mat if unsure how long it has been used for • do not place barriers such as tables, walls, or umbrellas between unit and desired area of protection.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN AND PETS.

For outdoor use as an insect repellent only. Do not use indoors, in tents or any enclosed area. Do not touch the grill while the appliance is in use. The grill is hot while in use. Do not insert anything other than Thermacell mats into the appliance. Place appliance on a flat, stable surface with the grill facing upward. Do not cover with any material while in use. Clean with a damp cloth only when the appliance is cool and inactive. Wash hands after use. Cartridge contains flammable, pressurized butane. Do not use near fire or flame. Protect the butane cartridges from sunlight. Do not expose them to temperatures above 50°C. Do not pierce, break or incinerate butane cartridges, even after use. Butane cartridges other then Thermacell cartridges will not work in this appliance. Seller will not be held responsible for damage, injury or poor performance caused by use of other butane cartridges or repellent mats.

CAUTION

This pesticide is highly toxic to fish. Do not apply directly to water. Drift from treated areas may be hazardous to organisms in adjacent aquatic sites.
This pesticide poses a high risk to beneficial invertebrates (eg. honeybees). Do not disperse in an area where bees are foraging; or on plants likely to be visited by bees if the plant is in open flower or part bloom, or is likely to flower within 10 days following application.

STORAGE AND DISPOSAL

Store in the closed, original container in a cool, dry place out of reach of children. Do not store in direct sunlight. Store unused mats in original packaging in a cool, dry place inaccessible to children and pets. Store butane cartridges in a cool, dry place away from sources of heat. Do not reuse empty envelopes. Wrap used mats and butane cartridges and place in garbage. Do not incinerate cartridges.

SAFETY DIRECTIONS

Wash hands after use.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre (Phone Australia 13 11 26; New Zealand 0800 764766). Take appliance, label or product name and APVMA or HSNO Approval Number with you when seeking medical attention. Harmful if swallowed.
